Election/Restrictions

In response to applicant's amendment of 10-18-2005, the examiner notes that most of the claims presented in applicant's amendment do not appear to be supported by the original specification or claims. The examiner finds no teaching of relative sizes of lumen cross sections as specified in claims 7, 8, 24 and finds no teaching of an embodiment having a redirecting tip attached to a lumen of a coaxial lumen as claimed in claim 6. The redirecting tip embodiments 8, 13, and 3 are side by side and not coaxial. The examiner requires the following election of species and requests applicant to particularly point out how the elected claims are supported by the elected species.

This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I - figure 1

Species II - figure 2

Species III - figure 3

Species IV - figure 4

Species V - figure 8

Species VI - figures 9 and 10

Species VII - figures 11 and 12

Species VIII - figure 13

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is

Art Unit: 3766

finally held to be allowable. Currently, no claim is generic. It also appears that no claim is supported by the original specification raising the issue of new matter.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 3766

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
